DETAILED ACTION***Election/Restrictions***

Applicant's election of group I comprising claims 1 – 24 and 27 – 30 in the reply filed on 11/30/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 25 and 26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 24 and 27 – 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Bastiaans (U.S. Pat. No. 4,735,906).

Regarding claims 1 – 24, Bastiaans anticipates a sensing device, *inter alia*, comprising: a piezoelectric resonator (e.g., 18) having a functionalized surface for sensing; and a second resonator (e.g., 19) (see col. 2, line 35 – col. 8, line 36; figure 1). The Courts have held that the manner of operating an apparatus does not differentiate an apparatus claim from the prior art, if the prior art apparatus teaches all of the structural limitations of the claim. See *Ex Parte Masham*, 2 USPQ2d 1647 (BPAI 1987). Furthermore, the Courts have held that apparatus claims must be structurally distinguishable from the prior art in terms of structure, not function. See *In*

Art Unit: 1743

re Danley, 120 USPQ 528, 531 (CCPA 1959); and *Hewlett-Packard Co. V. Bausch and Lomb, Inc.*, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990) (see MPEP § 2114).

Regarding claims 27 – 30, as discussed above, Bastiaans teaches and/or suggests all of the positively recited structure of the apparatus provided in the claimed method, which merely recites the conventional operation of that apparatus. Regarding process or method claims, a prior art device anticipates a claimed process, if the device carries out the process during normal operation (see MPEP § 2112.02).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional prior art teach various pertinent sensing devices and methods.
